Local Authority Health Profile 2019

This profile gives a picture of people's health in Harborough. It is designed to act as a 'conversation starter', to help local government and health services understand their community's needs, so that they can work together to improve people's health and reduce health inequalities.

Visit <https://fingertips.phe.org.uk/profile/health-profiles> for more area profiles, more information and interactive maps and tools.

Health in summary

The health of people in Harborough is generally better than the England average. Harborough is one of the 20% least deprived districts/unitary authorities in England, however about 7.2% (1,070) children live in low income families. Life expectancy for both men and women is higher than the England average.

Health inequalities

Life expectancy is 3.8 years lower for men and -1.5 years higher for women in the most deprived areas of Harborough than in the least deprived areas.

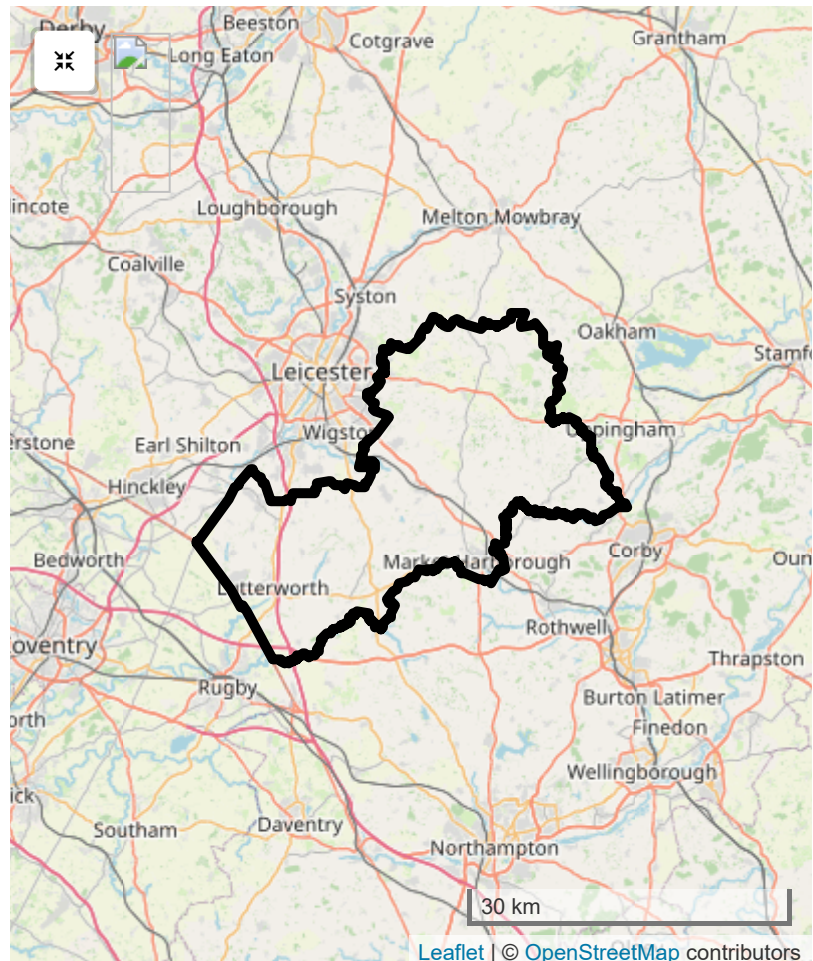

Child health

In Year 6, 14.9% (139) of children are classified as obese, better than the average for England. The rate for alcohol-specific hospital admissions among those under 18 is 26*. This represents 5 admissions per year. Levels of teenage pregnancy, GCSE attainment (average attainment 8 score) and smoking in pregnancy are better than the England average.

Adult health

The rate for alcohol-related harm hospital admissions is 561*, better than the average for England. This represents 536 admissions per year. The rate for self-harm hospital admissions is 142*, better than the average for England. This represents 120 admissions per year. Estimated levels of smoking prevalence in adults (aged 18+) and smoking prevalence (in routine and manual occupations) are better than the England average. The rates of new sexually transmitted infections and new cases of tuberculosis are better than the England average. The rate of hip fractures in older people (aged 65+) is worse than the England average. The rates of statutory homelessness, violent crime (hospital admissions for violence), under 75 mortality rate from cardiovascular diseases, under 75 mortality rate from cancer and employment (aged 16-64) are better than the England average.

* rate per 100,000 population

Indicator value types

1,2 Life expectancy - years 3,4,5 Directly age-standardised rate per 100,000 population aged under 75 6 Directly age-standardised rate per 100,000 population aged 10 and over 7 Crude rate per 100,000 population 8 Directly age-standardised rate per 100,000 population 9 Directly age-standardised rate per 100,000 population aged 65 and over 10 Proportion - % of cancers diagnosed at stage 1 or 2 11 Proportion - % recorded diagnosis of diabetes as a proportion of the estimated number with diabetes 12 Proportion - % recorded diagnosis of dementia as a proportion of the estimated number with dementia 13 Crude rate per 100,000 population aged under 18 14 Directly age-standardised rate per 100,000 population 15,16,17 Proportion 18 Crude rate per 1,000 females aged 15 to 17 19,20 Proportion 21 Crude rate per 1,000 live births 22 Proportion 23 Index of Multiple Deprivation (IMD) 2015 score 24 Proportion 25,26 Slope index of inequality 27 Proportion 28 Mean average across 8 qualifications 29 Proportion 30 Crude rate per 1,000 households 31 Directly age-standardised rate per 100,000 population 32 Ratio of excess winter deaths to average of non-winter deaths 33 Crude rate per 100,000 population aged 15 to 64 (excluding Chlamydia) 34 Crude rate per 100,000 population

*	Value compared to a goal (see below)
~	There is a data quality issue with this value
\$	Due to an issue with HES coding in Nottingham University Hospitals Trust in 2016/17, for which over 30% of records did not have a valid geography of residence assigned, this value should be treated with caution. In 2015/16, between 10% and 20% of patients that attended hospital from this area were treated at Nottingham University Hospitals Trust.
^	Aggregated from all known lower geography values

Thresholds for indicators that are compared against a goal

Indicator Name	Green	Amber	Red
12 Estimated dementia diagnosis rate (aged 65 and over)	>= 66.7% (significantly)	similar to 66.7%	< 66.7% (significantly)
