

Typology	Primary purpose and vision	Quantity	Quality	Accessibility
			<p>The overall quality vision for open space should be <b>'A Clean, litter free and dog fouling free area that has appropriate facilities, amenities, habitat and biodiversity that are maintained appropriately, accessible and in a usable condition'</b></p> <p>How this applies specifically to each typology is detailed below</p>	
<b>Parks and Gardens</b>	Accessible, and free to use high quality opportunities for informal recreation and community events.	0.4 Hectare per 1000 people in the population	These sites should be welcoming places that are well maintained with appropriate parking, lighting and information boards. They should provide areas for community events and also biodiversity where possible. They should be maintained to Grade A on LEQSE	10 mins (drive or bus) 4km
<b>Natural and Semi-Natural</b>	Natural and semi-natural areas providing access to	8.5 hectare per 1,000	These areas should provide primarily for biodiversity.	20 mins (walk) 1.6km** Woodland Accessibility

<b>Greenspace</b>	wildlife, environmental education and awareness, biodiversity and nature conservation. The typology includes woodlands, scrubland, wetland and nature conservation areas.	people (in a country area) 1.5 ha per 1,000 people population ( in a city or town area)	They should be clean and maintained to Grade B as a minimum on LEQSE, and should have clear routes indicated for access, either with formal or informal paths. Information boards should be used where appropriate. Where there is a destination site parking should be provided.	standards <ul style="list-style-type: none"> <li>• a wood of at least 2 ha within 500m of their home; and</li> <li>• a wood of at least 20 ha within 4km of their home</li> </ul>
<b>Amenity Greenspace</b>	Sites that provide opportunities for informal activities close to home or work or enhancement of the appearance of residential or other areas.	Because this sort of open space is usually a linear footpath or cycle route, this could not realistically be measured	These sites should be accessible and well maintained to a minimum of Grade B on LEQSE. They should provide areas for informal recreation and biodiversity	10 mins (walk) 800m
<b>Green Corridors</b>	Sites that are accessible and free to use for walking, cycling or horse riding, whether for leisure purposes or travel, and opportunities for wildlife migration.	0.9 hectare per 1000 people in the population	These sites should be accessible and provide clear information for users concerning times and or distances to destinations. They should be maintained to Grade B on LEQSE. They should retain corridors that are suitable for wildlife migration.	20 mins (walk) 1.6km*
<b>Formal Outdoor Sports</b>	Sites that may not be free to use specifically intended to meet demand for formal participation in outdoor sports including pitch sports, tennis,	'Fields in Trust' survey 2015 determined that 1.6 to 2.0 ha per 1000 population was an	These sites should be dog fouling free, and maintained to a minimum of Grade B on LEQSE. They should be	10 mins (drive or bus) 4km

	bowls, athletics or countryside and water sports. Includes school playing fields	appropriate level of provision based on responses to their survey. HDC has previously used 1.6 ha per 1000 population as a minimum provision and local consultation has determined that respondents still consider this appropriate.	available with changing facilities suitable for the sports played and parking facilities. They should be accessible with clear information about how to book the pitches and approved use.	
<b>Provision for Children &amp; Young People</b>	Areas designed primarily for play and social interaction involving children and young people, such as equipped play areas, multi-use games areas and skateboard parks.	0.3 hectare per 1000 people in the population	These priority areas should be maintained to Grade A using LEQSE and be monitored on a suitable frequency by qualified persons. They should be accessible for local people and provide challenging but suitable equipment. Large play areas (NEAP) should provide activities for all ages. LEAPs may focus on a particular age range.	5-10 mins (walk) 400m – 800m
<b>Allotments</b>	Opportunities for those people who wish to grow their own produce as part of the long term promotion of sustainability, health and social inclusion	0.35 hectare per 1000 people in the population	These sites will provide plots of a suitable size for allotment gardening and be well maintained to a minimum of Grade B on LEQSE. They will provide	10 mins (drive or bus) 4km

			accessible irrigation water from troughs as a minimum, and information concerning how to apply for an allotment.	
<b>Cemeteries &amp; Burial Grounds</b>	Sites for quiet contemplation and burial of the dead, that are also linked to the promotion of wildlife conservation, biodiversity and provide a link to the past.	0.35hectare per 1000 people in the population	These sites will be well maintained to a minimum of Grade A on LEQSE. They will be welcoming places with information provided for the public concerning permitted use and suitable facilities for quiet contemplation. They will provide areas for biodiversity where appropriate.	5 mins drive or bus 2km
<b>Civic Spaces</b>	High quality spaces that provide access to shops and can facilitate community events. Also provide a setting for civic buildings.	There is not a normal amount for this sort of open space. The Council would look to provide new pedestrian spaces when a new shopping centre is built or enhance existing civic spaces through contributions	These areas will be maintained to Grade A using LEQSE. They will provide suitable spaces for public events and high quality and appropriate street furniture. Where planting is provided it will be well maintained. Hard surfacing will be appropriate and well maintained and of high quality.	Accessibility standard not appropriate
