Mental and physical health are interlinked, and we know that statistics show that people with disabilities are less likely to be active which in turn impacts on their mental health. Some of this lower level of activity can be attributed to lack of accessible facilities so this project, which is designed to be inclusive, will ensure that this is not a barrier. Good project principles in terms of building on a successful model and improving the numbers of the community that can be positively affected. 				
Comments from Officers Panel	<p>Freedom Support Solutions do charge for their services so not sure how this works with the tennis coaching, also children and young people from outside the Harborough District attend Birkett House School so I am not sure if it would just be Harborough district children which the project would directly benefit.
